Package: BRP-SAMPLE-2026-08-0001 **Generated at:** 2026-08-27T00:00:00Z

This is a customer-review package, not yet a buyer-forwardable package.

Review every row; approve, replace, or exclude source-linked statements; confirm customer-specific facts; and authorize only buyer-forwardable evidence before finalization.

Any replacement wording is customer-supplied and does not inherit the original evidence citation.

Supported means record-supported at a cited buyer-forwardable source. It does not mean true, complete, current, compliant, secure, audited, certified, or accepted by the buyer.

Supported: An approved record states the answer; the citation shows where.

Customer confirmation required: The records point to an answer but a detail is missing, out of date or contradictory; you confirm it.

Not supported by submitted records: No record states it; nothing is filled in.

Each answered row is marked from records (with its citation) or written by your organization (no citation).

Rows you didn't approve are left blank, exactly as your client sent them. Hidden, retired and header rows are never touched.

Customer-confirmed and Customer-supplied are different final labels: the customer supplied the wording during finalization, and those rows are not record-supported.
