Total buyer requirements	5

What this package contains

- Buyer requirement matrix mapping each requirement to a response outcome and source.
- Source-linked response statements citing the exact document and location.
- An evidence binder describing each shared record and its access mode.
- A gap and confirmation report listing every item needing buyer-side confirmation or additional records.
- A buyer forwarding note, canonical manifest, Ed25519 signed receipt binding the manifest SHA-256, and verification instructions.

Evidence handling: 4 authorized downloadable record(s). Records marked internal are excluded and cannot support positive statements.
