

In plain language

Google Cloud hosts the service in Montréal.

Stripe handles card and invoice payments.

SendGrid sends order and sign-in email.

A change is posted before a new processor handles customer files.

The table lists the purpose and location of each processor.

Subprocessors

Version 2026-09-30.1 · Effective 2026-09-30.1

Scope: Third parties used for direct-client hosting, payments, email, analytics, and abuse prevention. Pack parsing, classification, drafting, and verification do not add a model provider.

- Direct-Client Data Processing Addendum
- Data Retention and Deletion Policy

AttestLayer may use the providers below to process personal information or customer data only for the listed service purposes. A provider is used only when the applicable feature is enabled. AttestLayer remains responsible for its subprocessor obligations under the Data Processing Addendum.

No AI model reads your records. Parsing, classification, drafting and checking of your questionnaire and records run as versioned, deterministic rules inside AttestLayer's

own Google Cloud project in Montréal. The service that processes your files has no access to any AI model service.

Customer questionnaires and records are stored and processed in Montréal. Business email addresses go to SendGrid. Card and invoice data go to Stripe.
Get notified: email privacy@attestlayer.com with "subprocessor updates" in the subject.

Provider	Purpose	Data categories	Processing locations
Google Cloud Platform	Application hosting, managed compute, database, private object storage, networking, logging, key management, and security.	Account, service, upload, package, and technical metadata.	Canada (Montreal) for primary service resources; limited provider support and security processing may occur in other locations under Google terms.
Google Workspace	Business email and correspondence (support@, billing@, privacy@ and security@ mailboxes)	Names, business email addresses and message content you send us	United States and other Google locations under Google Workspace terms
Stripe	Provider-hosted checkout, payment, invoice, tax, refund,	Business contact, order, billing, tax, payment status, and	Canada, United States, and other locations used by Stripe under

	dispute, and reconciliation services.	payment-method information supplied directly to Stripe.	its data-transfer terms.
Twilio SendGrid	Transactional access, order, package, support, privacy, and security email delivery.	Recipient business email, message content, provider message identifier, and delivery, bounce, or complaint events.	United States and other locations used by Twilio under its data-transfer terms.
PostHog	Optional, consent-dependent measurement on approved non-sensitive public pages.	Pseudonymous page, consent, device, and campaign metadata; no client request, source record, or package content.	The United States or European Union project selected for the deployment and disclosed through the applicable consent configuration.
Cloudflare Turnstile	Abuse and automated-traffic prevention on disclosed public forms.	Request, device, browser, network, challenge, and risk-result metadata.	Global Cloudflare infrastructure under its data-transfer terms.

Changes and objections

AttestLayer will publish an intended addition or replacement before it begins processing Customer Personal Data where applicable law or the accepted DPA requires an objection opportunity. An affected customer may send a reasonable, law-based objection to privacy@attestlayer.com. AttestLayer and the customer will work in good faith on a commercially reasonable resolution.

Privacy questions may be sent to privacy@attestlayer.com. See the Privacy Notice and security boundary.
